**Main Type of Biome:** Forest

**Camera Model:** Canon EOS Rebel T3i

**Mode:** Aperture Priority

**ISO:** 400

**Shutter Speed:** 1/125

**Aperture:** F /7.1

**Lens:** Normal

### **Artist's Statement:**

What attracted me to take my photograph was: texture, lines, and patterns. It looked like a big mouth drooling. I thought it was kind of gross, yet kind of cool. To make my photograph appealing I used Texture and Pattern, Framing, Rule of thirds, Focal point of interest, Monochromatic Colour combinations.

A question I have about the subject of my photograph is: Why is the tree drooling? Why is sap oozing out?

To improve my photo, I would change my position slightly or maybe change my aperture.
