**Camera Model:** Canon EOS Rebel T2i

**Mode:** Auto

**ISO:** 100

**Shutter Speed:** 1/400

**Aperture:** F /5.6

**Lens:** Normal

### **Artist's Statement:**

I took this photograph because I liked the fact that the colour of the butterfly really stood out against the green and butterflies always make you feel happy. The butterfly's wings seemed slightly damaged through my lens but I couldn't tell for sure.

To make my photograph appealing I used: Focal point of interest, Colour combinations, Depth of field, Angles.

My photograph makes me feel closer ( connected) to the natural world because I : took my time to capture it, saw it before and liked it.

To improve my photo, I would change my position and use rule of thirds better.
