

The
ROBERTA BONDAR
FOUNDATION™

“The rhythmic beauty of the cadence of life,
its patterns of protection and resilience
of form reflect biodiversity that is the
savannah.” – Dr. Roberta Bondar

“Secretary Birds on Nest”: a couple build their nest atop one of the occasional trees
of the savannah. © 2012 Roberta Bondar.

THE ROBERTA BONDAR FOUNDATION

Dr. Bondar’s space experience as a crewmember aboard the Space Shuttle Discovery left her with a whole new view of herself and the future of planet Earth. Addressing the growing nature deficit in society, The Roberta Bondar Foundation helps cultivate in all ages, a sense of awe, respect and appreciation for other life forms that share our planet. The fusion of photographic art and science stimulates our creative expression, curiosity, understanding of the environment and our inter-relationship with the elements of nature.
