# Why Are Trees So Important To Us ?

Trees are atmosphere cleaners of excess and harmful CO2 & other pollutant gases

Trees release oxygen into the atmosphere

Trees provide species habitats

Trees provide places to play

Trees filter the air by trapping its particulates on leaves and bark

Trees are beautiful to look at

Tree cover provides shade from the sun's ultraviolet radiation

Trees reduce heat by many degrees beneath their leaves to cool city areas

Trees can help counteract species loss

Trees provide habitat connectivity between regional forest patches

Trees protect soils

Trees clean soils

Trees hold moisture

Trees protect against erosion and flooding

Trees help slow water runoff

Trees filter groundwater

Trees reduce noise pollution

Trees act as windbreaks

Trees help communities provide energy and food

Trees help provide long-term environmental stability for communities

Trees help communities provide long-term economic stability

Trees provide natural medicinal materials

Trees in large tracts promote rainfall
