

10 THINGS YOU CAN DO TODAY TO HELP SLOW CLIMATE CHANGE

1.

Turn off the lights when you leave the room.

Turn off your stuff when you aren't using it.

2.

3.

Set up your own personal charging station with a powerbar for all your electronics. Turn it on only when something needs a charge. When devices finish charging, turn the powerbar off.

Waste less food. Pack or buy only what you really need.

4.

Take meals in a reusable bag or container.

5.

6.

To reduce waste, buy things that have less packaging.

7.

Take shorter showers!

8.

Use energy efficient compact fluorescent bulbs or LEDs.

9.

Reuse things you already have. Or trade them for something you could use or give them to people who could use them.

Choose products made from recycled materials when you can.

Recycle materials that you use – like cardboard, paper, cans, and bottles – for collection to recycle into useful new stuff!

10.
